HOAGLAND'S
NEW PATENT SHAFT COUPLING!
W. E. COOPER
HAS PURCHASED THE RIGHT FOR THIS County of the above Patent, and will hereafter use it in the construction of all the Vehicles manufactured at his extensive
Carriage Factory,
Corner of Second and Morrison Streets.
He respectfully refers to the following
CARD.
Having purchased the New Patent Shaft Coupling, invented by H. R. Hoagland, we feel pleasure in informing the public that in our opinion it is the safest and best method of connecting shafts or tongues to all vehicles that has ever been used.
It is done without bolt or screw, and is therefore, easily and speedily separated. It rests on Gutta Percha so as to be entirely free from the rattling sound which so often disturbs restless horses. It is easily changed so that the shafts or tongue may be detached in an instant, and is convenient, safe and secure.
It is easy to change to this style of coupling any buggy or other vehicle now in use, and with small expense. We have come to the conclusion to use this new invention ourselves and recommend its use in all cases. We consider it far superior to the Brewster Patent, heretofore considered the best in use.

#### The Repudiation Question in Tennessee.

NASHVILLE, Aug. 21.—The Secretary of State, Fletcher, publishes a letter to-day answering inquiries by Tennessee bondholders as to whether they had best hold their new bonds. He recommends to keep them, and says repudiation is impossible, because the bonds are collectable in the Federal Courts, and because the people of Tennessee are so honest and proud that no Legislature can adopt such a measure.

CINCINNATI, Aug. 21.—The weather is roasting hot, and four fatal cases of sun stroke have occurred since yesterday.

#### From Cuba.

HAVANA, Aug. 21.—Advices from Matanzas say the Captain General has reviewed the troops in that city. They express a willingness to go into active service. The rebels, 400 strong, in the Jurisdiction of Colon, have been committing depredations. They burned several estates. Col. Bergnassi, who left Puerti Padi with a regiment numbering 800 men, escorting a convoy to Las Tunas, encountered the rebels twice. Severe fights ensued, the result being unknown. Report says he reached Las Tunas. An officer of Captain General Dorods has arrived here from Matanzas, where he has been confined six months. He was released at the instance of Consul General Plumb and left for New York on the steamer *Missouri*.

#### BY ATLANTIC CABLE.

LONDON, Aug. 21—Evening.—The Oxford crew were out for practice to-day. They made good time, with 38 to 39 strokes per minute. The Harvard crew were also out with the Jewett boat. They go away briskly at nearly 40 strokes per minute. Their rowing is considered as very satisfactory. Good judges think they are likely to win the race. At the special desire of the Harvard's, Thomas Hughes, ex member of Parliament for Oxford, has been appointed referee. Simmons, of the Harvard's is slightly indisposed to-day. Betting is now 7 to 4 on the Oxfords.

MADRID, Aug. 20.—A band of Carlists have appeared near Cidad Rael. Poland was among the prisoners captured. Most of the Carlist band have been dispersed. It is rumored that a conspiracy in favor of the Prince of Asturias has been discovered by the authorities. Two Carlists were shot at Tamente without trial. An officer who recently shot nine Carlist prisoners has written an exculpatory letter. He says he complied with orders of the government and declares the order is only applied to highwaymen.

DUBLIN, Aug. 20.—The Archbishops of Armagh and Dublin have issued an address to the clergy and laity announcing the speedy meeting of the provincial synods, and requesting the laity to make preparations for sending representatives to the synods. The Archbishop offers no suggestions but invites freedom of action on the part of the lay.

BERLIN, Aug. 20.—A correspondent of the Prussian *Gazette*, at Rome, asserts that the late syllabus of the Pope will form the chief subject of of the deliberations of the Ecumenical Council. The paragraph covering the Church and State will be modified and probably intensify the dogmas of the infallibility of the Pope, spiritual and corporeal, and the assumption of the Virgin, will be promulgated. The Holy Father has expressed regret that no sciamatic or Protestant Bishop has offered to take part in the council.

PRAGUE, Aug. 21.—The Czech declare they will send deputies to the Bohemian Diet only on condition that an alteration shall be made in the election laws, and guarrantees given for a separate position of Bohemia in the Empire.

THE BRITISH COLONIES IN THE PACIFIC.—A statement has reached me of a startling kind, but from a quarter which renders it impossible not to give it attention. It would appear, according to this statement, that the remarkable indifference of England to the feelings of her colonists, which originally alienated the United States from her dominion, and in which she has never varied up to the present hour, is likely to involve consequences of the same kind with all those communities which she has planted during the last century. A meeting was lately held in London consisting of all the most eminent representatives of the Pacific colonies, and presided over by one of the most eminent, if not the most eminent, of provincial governors. At this gathering, deep and general dissatisfaction was expressed with the political and moral relations of their important and growing countries with the parent State. And all the influential colonists present, representing, in fact, all the important interests of their respective settlements, joined in the expression of a determination to require of Great Britain some reconstruction of her Empire, which should afford them a guarantee that the interests of the various colonies should receive due and proper attention. In the event of this being found impracticable—and the sense of the meeting was decidedly that it would be so found—it was declared by all present that they should use all their influence with their respective settlements to leave the British allegiance, and seek in some form the protectorate of the United States; or, at all events to become, in such a manner as may be agreed, members of the system of the Great Republic. The meeting was not public, but its results are likely to be known at an early day.—*London Correspondence New York Tribune July 24.*

CLOUD-BURST IN NEVADA.—The White Pine *Telegram* learns from parties just arrived from Shoshone district, that a cloud-burst occurred last week at a place about four miles north of Shoshone and in the same range. Several men were prospecting in the vicinity, and at the time were barely a mile from camp. Suddenly it changed from sunshine to cloudiness, and soon the heavens gleamed with flashes of lightning, and loud peals of thunder fairly shook mother earth. In the direction of their camp the clouds grew more dense and black and lowered near the earth; a fearful report was shortly heard, followed by continued and loud cracking, crashing, rumbling noises. After the noises had died away the sky cleared up as if relieved, and the sun peeped out from behind a cloud. All were annoyed at the singular phenomena. On nearing the locality where they had camped the ground was drenched and broken up, large rocks were found to have been washed from their former resting places, the largest trees lay felled, while many smaller ones were uprooted and cracked from end to end. Not a vestige was left of their camp, except part of the ground, sufficient to recognize it. Blankets, provisions, camp utensils, tools—everything was washed away and could not be found. The men made for Shoshone, where they were kindly treated. The effects showed that a vast amount of water must have fallen, and were we the prospectors, we should congratulate ourselves upon our personal escape, for had they been in camp they would have undoubtedly perished.

As an instance of what may be done by the application of city sewage to sandy soil, or sea-lands, we refer to a case, an account of which has recently been published in England. The Hon. Henry Petre, a few years ago, determined to see what could be done toward reclaiming a waste tract known as the Banking Sands. He laid out a farm of a hundred acres and manured it with London sewage, and for the past two years it has produced splendid crops of corn, roots, vegetables, and in fact everything that has been put into it. This is an experiment that appeals peculiarly to many portions of this country, and we observe that the San Francisco and Sacramento, Cal., papers are agitating the utilizing of the sewage of those cities. One California journal truthfully says that the time will come when the people will look back with contempt upon the barbarious wastefulness which threw away an invaluable fertilizing agent, and which suffered thousands of acres of land that might have yielded a rich revenue to lie waste, an eye-sore and a source of perpetual annoyance and discomfort to a great city.

RETURNING REASON.—The New York *Citizen*, an able Democratic paper, in a long article on "Democratic Principles and Practices," has the following remarks applicable to the Democracy that met in convention lately at Harrisburg (Pa.)

We hold that the Democracy, to succeed, must discard old issues, and bring itself fairly up to the times. It is useless to quarrel over questions that the force of circumstances has settled. We cannot re-enslave the negro, if we would. Our Southern brethren placed a whip in the hands of our enemies to drive us naked through the world. The rebel States of their own motion went out of the Union, and they had to be brought back by "military despotism," or they never would have come back at all. It was to the military tyrannies of Sherman, the violence of Sheridan, the impositions of Hancock, and the persistencies of Grant that we owe the restoration of the Union on any terms.

HOW TO CAN CORN.—The following receipt for putting up corn for winter use will be serviceable: Boil it fifteen minutes on the ear, then dry the grain an hour in pans in the warm sunshine; next salt it just as much as will season it for the table, fill tin cans leaving half an inch of space, put a gill or so of water in each can, and leave an aperature about the size of a pin in the cover for the escape of the gas, then place tins in a kettle, having just enough water to reach within half an inch of the top of the cans, then boil moderately three-quarters of an hour, and then solder up the vent. The corn will keep perfectly sweet and good as long as it is required.

LABOR AND CAPITAL.—Last Friday we went up to San Francisco and returned on Saturday. The city does not appear very lively just now. There is not as much improvement being made as usual at this time of the year. We conversed with several mechanics of our acquaintance who complained bitterly of hard times. It is with great difficulty that they can obtain work. This state of affairs, in our opinion, is due chiefly to the unsympathetic feeling existing at present between capital and labor in that city, and their hostile action toward each other. Without a co-operation of capital and labor, little can be accomplished in the way of improvement anywhere.—*San Jose Patriot.*

### The Total Eclipse.

HOW IT APPEARED AT DES MOINES, IOWA.

At Des Moines, Iowa, the eclipse was total, and many astronomers were engaged in taking observations. We take the following account of the appearance of the eclipse at that place from the Iowa *Register*:

APPROACH OF THE SHADOW.

The approach of the shadow was perceptible, and came on very, like twilight, and nothing of that "awful dark cloud" was visible in its coming. At 3:43,14, the moon made its first contact with the sun, in the northeast quadrant, nineteen and a half degrees from the west. Preceding the time of contact, the atmosphere became feelingly cooler, with a fresh breeze blowing from the east. The time first noted for the first contact was 3:42.26, which was found to be in error just 22 seconds. At 4:04 the shadow over the surrounding country became more distinct, the disc of the sun being about one-fifth obscured. A large spot was observed on the southwestern limb of the sun, and as the moon progressed over its disc, it elongated and spread out to at least one-third its diameter when it first appeared. At 4:3.50 it was totally obscured. The atmosphere became perceptibly more damp, with the shadow growing deeper, giving the foliage of the trees a deep green appearance, while the prairie north of the Observatory appeared as if bathed in a flood of dim twilight. The birds in considerable numbers flocked to the trees, and chirped and flew away as if greatly frightened. At 4:22 the chickens started for their roosts, but for some cause or another backed out and continued their scratching. A flock of geese near by started and commenced the usual clatter they make when a rain is threatening. Jaybirds became very boisterous, either from fear, or singing a royal welcome to the celestial show. At 4:35 the sun was fully three-fourths obscured, and the darkness increased in ratio. Away to the northward the groves and the farm houses were standing out in bold relief, just as if a heavy thunder storm was passing, and the only the darkness was much greater that at the Observatory. The birds became more animated, and fluttered from bush to tree, chirping as if in great dread. At this time not a cloud was to be discerned in the entire heavens, while in the southwest, horizon the heavens took on a faint coloring of muddy yellow. This time the chickens made another start for their roost, and the [illegible] after to-day. Young chickens dropped to sleep in the grass, and laid there chirping as long as the totality lasted.

TIME OF TOTALITY.

At 4:45.30 2-10, the sun was completely obscured, and the darkness was very dark indeed, for an eclipse. The country northward became an indistinct mass, while at the station it was very difficult to read the scale on the instruments. A very cool wind commenced blowing strongly at this time from the east, and the air became suddenly cooler, almost uncomfortably so, for a few minutes. Just before the obscuration, an irregularly shaped cloud, south of west, in the zenith, which was found to be a large protuberance. Now we come to the most beautiful and grand sight that this generation has ever witnessed, and that is

THE CORONA.

As soon as the obscuration was total, a gloriously bright ring or nimbus formed around the sun, and beat its rays out into space in all directions. The light of this was about equal to that of the light of a new moon. In the south part of the sun, a large protuberance was visible to the naked eye. It was [illegible] one-fourth part of the diameter of the sun, and to compare this with the [illegible] it was discovered at the April eclipse, it was at least fifty thousand miles high. On the north limb of the sun two protuberances appeared, one degree apart, were also visible. The rays on the southern edge of the disk extended as far as one-third the diameter of the sun. On the northern edge they were much shorter, and in fact were more diffused. The corona was egg-shaped, and very brilliant, but not so bright nor prominent as was expected. The moon hanging out boldly in the sky, surrounded by this [illegible] present corona, was one of the grandest sights that man ever beheld. With totality there burst into sight, Mercury, a little north of the sun lower down, and Venus, about five degrees to the [illegible] who shone with great brilliancy. Mercury appeared with the time of total obscuration, while Venus continued in the know 3' 45" after the sun had again partially appeared. No other stars were visible. The time of total obscuration was 2,521, ending at 4:48.22, being 6 and 2-

### How it Happened.

"Ah! we love each other well;
Better far than words can tell,
Said my charmer—"but in vain
Are my efforts to explain
How it happened! Tell me now,
Dearest, of the why and how?
Since the fact we cannot doubt,
Tell me how it came about."

Well, my darling, I will try
To explain the how and why,
(Speaking of myself—not you;
That, of course, I cannot do)
Not your (brilliant) mind alone
Could have thus enthralled my own;
Not the charm of every grace
Beaming from your sunny face;
Not your voice—though music be
Less melodious to me;
Not your kisses sweeter far
Than the drops of Hybla are;
None of these, from each apart,
Could have so enchained my heart,
Nay, not e'en the wondrous whole
Could have fixed my wayward soul;
Had not love—your love—prevailed,
All the rest had surely failed!

There! you have the reason, dear!
Is the explanation clear?

### The Boston Post on "Plowing the Air."

The Boston *Post* (Dem.) in its issue of July 21st has the following admirable article under the heading, "Plowing the Air." Will the Democracy of Oregon read, ponder and digest?

It was no inapt phrase that Judge Abbott employed in his letter to the Tammany Society, when he described the task of working among dead issues as the parallel, in its results, to plowing the air. The Democrats of Virginia entered a more substantial field, with intent to make more practical services, and they at once lifted their down-trodden State from the depths of military subjection to the level of self-government. They consented to negro suffrage and acceptance of the Fifteenth Amendment for this, as they had a perfect right to do; and by joining with the Conservative have achieved a triumph over the forces of an outside centralization which is theirs to enjoy and improve for all time. In their selection of such men as Rosecrans and Faulkner as gubernatorial candidates, the Democrats of Ohio and Pennsylvania wisely followed the suggestions of their Virginia brethren; and whether in their nominations the same will show that they undertook labor which Judge Abbott so graphically defines in the phrase above quoted, it is [illegible] ble that in their positive action, which is all that ra[illegible]s a living influence, they seized the opportunities which alone can yield them final victory.

So far as negro suffrage is concerned, it may be considered settled for ever. And to run a political campaign on an issue that is now at rest, would be like conducting a canvass without candidates. Democrats may not like this thing or assent to that, but if they seek to control the policy of the country in the future, they will waste neither time nor strength in [illegible] issues. It may not suit us in the [illegible] that reconstructed States are compelled to adopt the Fifteenth Amendment as the last condition of [illegible] permitted a restoration to their old relations in the Union; but the Democrats of Virginia have agreed, under the circumstances, to accept a condition, though so hard, to which [illegible] is no alternative, and it is impossible that the recent [illegible]ations of the Democratic [illegible] son to [illegible] do what has already been done by the Legislature of the latter State. If they oppose that amendment, it is needless to propose to submit it to the people, since it must be voting from the start; and the situation further suggests that all opposition at this date is of no effect within the State or out it. So far as Pennsylvania is concerned, and also [illegible] may be [illegible] a dead issue; and to work it over again is a task that has been described as plowing the air.

The [illegible] use, to [illegible]re [illegible]ge and the [illegible] virtue [illegible] of [illegible] the [illegible] matter; [illegible] of [illegible]country [illegible] in this negro [illegible] they will settle it by [illegible] their re[illegible] of [illegible]ts of [illegible] will [illegible]volve [illegible] been [illegible] 68. And [illegible] in favor manifestly a [illegible] for the Northern Democracy to undertake its resurrection.

A Cool Proceeding.—A married couple in this county, who had been living together for [illegible]ng over a year [illegible]ly in a [illegible] manner, and, to say the [illegible] of it, under very unusual circumstances. We know nothing about their married life, whether it had been happy or otherwise, but suppose it to have been very agreeable between the [illegible]. The [illegible] came home to dinner one day, as usual, and while eating his wife said to him, "Stephen, you had better eat a [illegible] for it is the last that I will ever cook for you." He inquired what she meant, when she informed him that she had just received a letter from a young man [illegible] whom she loved better than any one else in the world; that she was going to leave her husband and go to him, and that she [illegible] would (oughter) her [illegible]. After [illegible] was over she attired herself neatly, and soon after a hack called; her trunk, already packed, was placed on it, the woman got in, the driver cracked his whip, and away went the wife from home and husband forever. Such are the circumstances of the case as they have been told us.—*Evansville Journal.*

The present crisis in France is having a very important bearing upon German politics. It is imparting renewed vigor to the opposition in Prussia and even Austria, which is especially to be noted, in their clamors for a reduction of the military establishments which they view to be more than ever feasible on account of the Emperor Napoleon being so [illegible]ed by home affairs that it precludes for some time to come any aggression on his part. They come out strong in figures, which, however, cannot be gainsaid. The present military strength of the continental Powers, [illegible]: France has [illegible],350,000 soldiers; North Germany, 1,024,946; South Germany, 200,171; Austria and Hungary, [illegible],176,000; Italy, 480,451—a total in these six realms of 5,580,000 men. They then go on to [illegible] in order to give each man in these realms who contribute in no one way to the productiveness of their country, a daily ration of a quarter of a pound of meat, it would require no less than 2,695 head of cattle to be slaughtered daily. Such a kind of armed peace is more ruinous to a country than all the horrors of war.

Free Postage.—The Postmaster-General in reply to a petition of American citizens in Paris, [illegible] had been endeavoring [illegible] years [illegible]ly in a [illegible] manner, and, to say the [illegible] of it, under very unusual circumstances. We know nothing about their married life, whether it had been happy or otherwise, but suppose it to have been very agreeable between the [illegible]. The [illegible] came home to dinner one day, as usual, and while eating his wife said to him, "Stephen, you had better eat a [illegible] for it is the last that I will ever cook for you." After [illegible] was over she attired herself neatly, and soon after a hack called; her trunk, already packed, was placed on it, the woman got in, the driver cracked his whip, and away went the wife from home and husband forever. Free Postage.—The Postmaster-General in reply to a petition of American citizens in Paris, [illegible] had been endeavoring [illegible] years [illegible]ly to negotiate a treaty with France for the reduction of postage, but had thus far failed, owing to the fact that the postal system of France is established for revenue purposes. French postage was much higher than ours and the Government claimed that it could not afford to divide postage with us equally if the rates were reduced. The best that France has been willing to do is to allow the United States Government one-third of the postage and retain two-thirds for their own treasury. This has been positively declined by the United States, and thus the matter stands at present. Senator Ramsey, who is now in Europe, has been authorized to call the attention of the French Government again to the subject, but the department has little hope of success in negotiating a postal rate.

The Latest Dodge of Thieves.—The thieves of New York have a new and ingenious way of raising the wind. One miscreant pretends to be a revenue officer, and appears suddenly before a tradesman after Court hours, arrests him and drags him before another miscreant, who assumes to be a United States Marshal. It is too late for trial, and accordingly the prisoner is informed that he must pay his fine—amounting usually to $22 50—or go to Ludlow street jail for the night. The prisoner is alarmed and anxious for his family, who will be worried at his absence. He therefore pays the fine, when he is quietly but forcibly shoved out of doors, and the thieves divide the spoils and scatter. All this is done, remember, in broad daylight.

### ENDORSEMENTS.

OLYMPIA, W. T., March 27, 1869.

C. A. WHITE, Esq.—*Dear Sir:* Having examined your original map, embracing that portion of Washington Territory west of the Cascade Range, I desire to add my testimony to its value. Having been engaged for a number of years in the surveys from Cape Flattery to the Head of Puget Sound, I have examined this portion of your map more critically than others, and I take pleasure in vouching for its general correctness.

This map will fill a want that has long been felt, not only among the residents of this Territory, but others, who are desirous of obtaining information of this portion of the "Far West," and I trust that we shall soon see it in a form suitable for general distribution.

JAS. S. LAWSON,
Asst U. S. C. S.

We endorse the annexed opinion of Jas. S. Lawson, Esq., and will add that Mr. Chas. A. White is a practical Surveyor, and has had access to the township maps in the two Land Offices in this Territory, as also the Coast Survey charts; and we can vouch for his map of Washington Territory, west of the Cascade Range of Mountains, as being correct, and the only good map of the same territory that has been made.

### GENERAL NEWS ITEMS.

Cincinnati has resolved to send a "commercial party" to San Francisco in imitation of Chicago. They will leave Cincinnati September 1st, and go by way of St. Louis.

John G. Nicolay, private Secretary to President Lincoln, and recently United States Consul at Paris, has a farm of 350 acres in Osage county, Kansas, on which his father resides. He is now visiting it.

New York, which has as yet no monument to DeWitt Clinton, Gouverneur Morris, Washington Irving, Robert Fulton and other of its great men, proposes to erect one to Fitz Greene Hallock, a native of Connecticut.

The Buffalo *Courier* says it knows prominent and influential Democrats in all sections of the State who intend to vote for the amended Constitution, and its adoption or rejection is not likely to be made a party question.

The emigrants to the United States that have arrived at Castle Garden, New York, from January 1st to August 4th, 1869, amount in number to 169,086, against 133,975 during the same period in 1868—an increase of 24,189.

Andrew Jackson Davis, the "American Swedenborg," occupies a modest cottage in Orange, N. J. He once lived in New York, but was so run down by followers and admirers that he was forced to flee to the wilds of Jersey from their persecutions.

Mrs. Elenor R. Campbell, of Kansas City, Mo., gives notice in the papers there, that she will release all her interest in a large amount of property, sold recently by her deceased husband, and conveyed by deeds which omitted to convey her dower. She proposes to do this without fee or reward, "not wishing to make money at the expense or by the mistake of others, but to do unto all as she would have them do unto her."

Commissioner Delano holds that assessors have full power to investigate returns, and to judge whether gentlemen who live at the rate of ten thousand a year and pay taxes only on one, make honest statements of their incomes. This will be a disagreeable sort of thing for some people to submit to; but the Commissioner is right. If we have the law at all, we ought to enforce it. Without some such inquisition the burden falls on the honest men, and the rogues get off lightly.

The Governor General of Canada, Sir John Young, recently made a speech at Quebec, in which he frankly told the Canadians that, though England is prepared to defend Canada as long as that Province wishes such help, yet if Canada seeks another alliance, England will not interfere to prevent it, but will accede to it, only asking that the Canadians may still preserve friendship for the mother country and remain a firm ally of England. The leading newspapers of Canada regard this as [illegible] in the light of an invitation from England to establish an independent Government.

### THE WEST.

There is less snow on the north side of the Shasta Butte, than has ever been known before since the settlement of Siskiyou county by white people.

Koopmanschap, the Hollander, who makes a specialty of importing Chinese, brings over men only. The women, he says, are sure to follow, at their own expense.

Last week, says the Shasta *Courier*, a man named John Wilcox, a Red Bluff teamster, was kicked in the breast by a horse at the Tower House and killed.

The San Francisco *Herald* says the Democratic municipal ticket of that city cannot be elected. It says it is as much past praying for as if it were already doomed and sent to judgment.

Ten tons of ore per day is extracted from the Poorman mine of a fair paying quality. The shaft is 400 feet deep. A well defined ledge, about one and a half feet wide, is visible in the south level.

A California paper says: Last Saturday a threshing machine threshed 3,010 bushels of grain in one day, on Campbell Berry's ranch, in Sutter county. This is claimed to be the most grain ever threshed in one day.

Six vessels have this season been loaded with grain at Vallejo, Cal., for Europe or New York, and the seventh is taking in cargo, and all these without the use of the Elevator, because, as it is said, the offices will not insure vessels carrying grain in bulk.

An Owyhee paper says: Colonel Jennings was in town this week, and says that the grasshoppers attacked his ranch on Catherine creek in large bodies, but with the aid of a brush and his old *sombrero*, which evidently bears the honored scars of well fought battles, he succeeded in 'standing them off' to the extent of saving nearly all his vegetable crop.

An Owyhee paper says: As the Boise stage was going down the steep grade beyond the Summit, on Friday evening, it met a team in the road where the grade was too narrow to pass. The teamster took part of his oxen and hitched to the hind part of the coach to back it up to a wider place. During the operation the chain broke, letting the coach run off the grade, when it went tumbling to the bottom of the ravine, a perfect wreck, where it remained at last accounts.

Lauren Upson, the Union Republican candidate for the State Senate, says the Folsom (Cal.) *Telegraph*, made an excellent speech at Michigan Bar on last Wednesday evening, during which he referred to the files of the Sacramento *Union* of 1853, in which article after article appeared, of which paper then and for many years after, he was the editor, urging the Democratic State Government and Legislature to take measures to stop the emigration of Chinese, as then was the time to do it—all which passed unheeded.

TUESDAY MORNING, AUGUST 24, 1869.

### The Land Grant on the Central Route.

A correspondent of a leading Eastern journal, writing from Cheyenne, states the results of some of his observations relative to the value of the land grant along the route of the central continental railway. He sets down the entire grant from Rock Creek, west of Little Laramie Plain, to Salt Lake valley, over 400 miles, as absolutely valueless. There are it is true, here and there occasional narrow strips of patch land. Small patches of bunch grass are found in the mountain hollows and along the mountain streams, sufficient in the days of teaming, to furnish scant pasture for mules; and probably available, at some future day, for herds of sheep; but these scattered tracts of good land are nowhere available for settlement, and will not be for many years. In the whole tract there is doubtless much grazing land, but it will not be valuable till long after the present railroad company is "out of the ring."

The same authority divides the land grant of the Union Pacific as follows: the first 300 miles from Omaha is valuable, the next 400 miles of average value, a portion for agriculture, but the rest for grazing; the next 400 miles is practically worthless, at least within the present generation, and the remaining fifth section on the route of only average value. When we get upon the Central Pacific, particularly in Western Utah and Eastern Nevada, the land is still more worthless. Those worthies who thought the land grant too great, certainly need not worry about the giving away of all that borders the central section of 600 or 700 miles. The land grant, the part of it which is valuable, will be of great value in a few years, but for any "way trade" for this section now under consideration, they must look to mineral resources alone.

The superior excellence of the land grant on the Northern Pacific route is a very strong argument in favor of their speedy construction of a railway over it. Along a great part of this route the country is capable of supporting a large population, and no rail road will therefore have the benefit of an extensive way trade. It is questionable whether the road which has already been built over the central route, having little to the way travel and no probability of ever having any worth speaking of, can be made to pay interest through a section of country abounding in good land and favored with a mild climate and all the elements of wealth. Some of our California exchanges are loud in their denunciations of the railroad company, and are clamoring loudly on the railroad company to build a new road and build up a rival line. It is quite within the range of probability that a Northern and a Southern railway will be built which, in fifteen years, will be the principal route over the continent, while the Central route, though first to get a road, will be comparatively dis-

[illegible] that the Democracy are a party of principle, a party of broad lines, a party which is not to [illegible] to any species of violence. Hence the Pendleton school of politicians continually [illegible] in such language as they would use if they were endeavoring to incite a low, and vicious rabble to some act of retaliation upon the governing party of the country. The Democracy are addressed as if they were a poor, ill-used, over-taxed and oppressed class of people who would be justified in appealing any means within their power to avenge the wrongs upon them. Every argument which is addressed to them by this class of politicians is based on the idea that they are the lowest class of our population, that they care nothing for honesty, the rights of property or the pledges of the Government, and that they can be most effectually moved to action by appealing to the passions natural to such a class of people. Accordingly Pendleton and his imitators endeavor to make them believe that the labor of the country is oppressed, that the "poor" who have nothing to tax have all the taxes to pay, that the rich are their natural enemies, that it would be desirable to repudiate the national debt, and that legislation must be had to secure a more equitable division of property. Pendleton has just written another letter to the proletarian Democracy, enforcing these ideas. Now we should think respectable Democrats would stand aloof from a party whose leaders think so meanly of it. For they cannot deny that every argument which is addressed to the party by its orators and journals seems to be founded on the assumption that the party is composed of that class who can be moved only by such appeals as are suited to the [illegible] and prejudices of the low, the vicious, the sordid and the illiterate elements of our population.

### In General.

Lanman's Dictionary of Congress, containing sketches of all the members who have served in that body, is an invaluable book of reference. We have received a copy of it from Bancroft & Co., booksellers and publishers, San Francisco. Also a copy of Ross Browne's "Resources of the Pacific States and Territories," and his "Exploration and Settlement of Lower California."

At a recent meeting of merchants in Chicago, the Chairman declared that the commerce already opened between Chicago and San Francisco would be speedily extended to China. Every member of the party, thirty-six in number, entered into contracts in San Francisco of importance connected with their several branches of business, and one of them made a sale of an invoice of goods for direct shipment to China by merchants of that country.

The last consular report of Mr. Nicolay, dated Paris, April 29th, 1868, exhibits in tabular form the commercial movement thence to the United States during the period extending from July 1, 1863, to Dec. 21, 1868. The grand total for the five and half years is $737,839,821. Of the thirty-six articles comprised in the schedule, much the largest proportion represent luxuries, of which women are the principal consumers. Articles of this description pay a large portion of the duties collected at our ports; yet senseless demagogues aver that the tariff falls most heavily on the working classes.

### Tighter and Tighter.

Under this caption, the Sacramento *Bee*, of the 14th inst, has an article on the San Francisco money market, in which the banks of that city are severely dealt with. After showing that though wheat is advancing in Europe it does not advance in California because there is no money there to buy it with, the *Bee* goes on to say;

**And now we are told that the banks will loan no more money, even upon real estate security. They will not even purchase gold bars, nor will they allow any one to overdraw his account. What kind of banks are they that thus hamper the money market instead of relieving it? What are banks for? to borrow money or to loan money? Elsewhere they are to loan, but in San Francisco they do nothing but borrow! They seem to have no capital of their own; and so soon as their depositors withdraw their funds there is nothing left to loan! An institution in Europe or the Atlantic States calling itself a bank that would act thus would be ridiculed out of existence in a month—the public would lose all confidence in it, and if it could not lend, merchants and capitalists would take care that it did not borrow from them! They would have no faith in a moneyed institution that had no money, or having it that would fail to relieve the pressure in the money market. No more deposits could a bank so managed receive.**

A prominent merchant of San Francisco, one one who has been doing business there for more than a decade, and always banking in one place, went into his bank the other day and said that he wanted to over draw $3,000 for a few days. The cashier told him that it could not be, so the merchant went direct to the manager and asked him what this meant. He was answered that money was scarce, depositors might come after it and really he could not let it go. "What then are you here for?" inquired the merchant. "If you have no money to loan why don't you shut up shop? If you keep a bank why don't you do as banks do; but if you are merely a shaving institution why don't you haul down your present sign and put up the three balls? Balance my account; I have done with you." And the banker actually did him $3,000 or $10,000, but he refused to have any future dealings with such a house. A bank that can't loan money to its customers on proper security when they want it, is a delusion, and is not deserving of patronage. It is the business of banks to relieve the money market when it is distressed. That is their use and their only use; and if they fail in this they fail in their whole duty to the community. And it seems now that all the banks of San Francisco are alike. None of them have anything to loan—they are not banks, but mere borrowers or brokers, who as long as other people give them money and charge them nothing for it, have something to loan, but as soon as the people go after their own the banks are forced to shut down on their best customers and tell them that they are unable to render them any facilities! It is to be hoped that [illegible] day in California we shall have at least one bank that is not doing business on borrowed capital; one bank that, when the money market remains tight, will have something to loan—one bank that will not belie its name by doing business on its own funds and not entirely dependent on depositors for the amount that may be permitted to remain in its coffers! When money is plenty all the banks can loan. No thanks to them, for then they have other people's money; but when money is scarce they loan nothing. And these, and such as these, are the banks of San Francisco. They are all a shade worse than shoddy.

Commenting on the scarcity of money and the effect of the stringency on the wheat crop, the Sacramento *Union* of the 17th inst. says:

We are informed that wheat buying in Stockton last Friday and Saturday was at a stand, and that no purchases could be made at any price for want of cash. The San Francisco "money kings" is partially the cause of this. Farmers will be [illegible] by the stringency in the money market and Treasury act not to compel our farmers to take less for their crops than they are worth. If San Francisco has not the cash to buy, the [illegible] should form an association, put themselves in instant communication with New York and Liverpool, and deal directly with buyers there.

The prospect, as set forth by these journals it must be owned is not a very flattering one. Such a state of facts shows the supreme importance of our learning in Oregon as speedily as possible to depend on ourselves, and to look for ways of marketing our products without relying entirely on San Francisco to take them and furnish the money for payment. In other words, we should adopt the recommendation of the *Union* and put ourselves in communication with those who have money to buy.

The Germans of San Francisco will make Carl Schurz, United States Senator from Missouri, their guest during his stay in that city.

### OREGON.

A correspondent of the *Farmer* writes from Eugene: Last week I paid a visit to Mr. George Leasure's farm. He has four acres of rich new land for the culture of hops. In the beginning of February last Mr. L. planted 6,000 hop roots, two in a hill, and eight feet apart. He thinks they will average 2,500 pounds per acre, which, at 25 cents per pound will realize the snug little sum of $2,500. Do farmers in Oregon raise any crops that are more profitable than this?

The Jordon creek quartz lead, situated about two and a half miles from Canyonville, is now owned and being prospected by Messrs. Gordon, Lord, Levens and Abrahams. They have lately sunk a shaft to the depth of sixty feet, and are now about to commence tunneling. They have an arastra erected on the lead, and have already crushed several tons of the rock, from which they took gold enough to place the richness of the lead beyond question.

The *Sentinel* some weeks since having stated that the Indians in the Klamath country are becoming troublesome, Col. Otis, commanding at Fort Klamath, writes to that paper, denying the statement. He says he has "been through almost the entire country of the Piute Indians, and no Indian could be more peaceable. The Klamath Indians are peaceable and appear perfectly satisfied. No twelve hundred Indians of any tribe have been headed by any desperate white men, like Archy McIntosh; and the individual named is now with me as guide and scout, and has been for some weeks. Be assured that the Indians throughout the whole country were never more peaceable."

From the Roseburg paper Judge Kelsay's decision in the case of L. Howe against Douglas county has lately been received at the county clerk's office. This action was brought by ex-sheriff Howe against the county, at the May term of the Circuit Court, to recover about one thousand dollars for constructive mileage. The Judge took the case under advisement, and has recently rendered his decision in favor of the county and against the plaintiff for the costs of the action. The case will probably be appealed to the Supreme Court, and if Judge Kelsay's decision should be sustained, it will save this county—as well as others in this State—a large sum of money heretofore annually paid to ministerial officers for services never performed. The question involved in this case is one about which there has been much controversy, and we are glad that it is likely to be authoritatively settled.

From the *Farmer*: We examined, a few days ago, part of a lot of 20,000 pounds of California raised wool, purchased in San Francisco by Mr. Hoyt, superintendent of the woolen factory in Salem. It was a very uniform lot, grading from three-fourths to full blood merino, light, clear of burrs, in excellent condition, purchased, Mr. Hoyt informed us, at 47½ cents per pound, costing 18½ cents delivered at the factory here. The wool gave evidence that the sheep from which it was shorn had been bred judiciously and persistently toward the merino, the Australian and French, we should judge. Mr. Hoyt went to that market to buy coarse wool, for manufacturing into blankets, but could find none such as he wanted. He thinks California produces very little coarse wool. This wool, a first class article for cassimeres, is the very reverse of what we supposed the Oregon factories were going to California for.

DISPATCHES TO THE OREGONIAN

### DATES TO AUGUST 23.

#### National Labor Congress.

PHILADELPHIA, Aug. 23.—The Labor Congress elected Richard Trevillock, President; A. T. Caves, of Washington, First, and Conrad Kuper, of New York, Second Vice President. J. W. Watts, of Philadelphia, Recording Secretary, and A. C. Phelps, of New Haven, Treasurer. The new officers were installed and appropriately addressed the Congress. A. C. Cameron, of Illinois, and S. C. Tucker, of New York, were elected delegates to the European National Labor Congress, to be held in Switzerland. Cincinnati was chosen as the place for holding the next Convention.

The committee on a new political party reported that they were unable to agree, and by request, were continued till next year. Resolutions of sympathy with the Cuban revolutionists, the Irish patriots and the oppressed millions of Europe, were adopted, and also for the reduction of the naturalization term from five to three years. The Congress then adjourned.

#### Monument to Lincoln

NEW YORK, Aug 23.—T. G. Churchill, Treasurer of the Lincoln Monument Fund, published a letter to-day in which he states that a contract was made with H. K. Brown, the celebrated sculptor and author of the Washington Monument in Union Square in this city, that he has finished the plaster cast of the late President, which was accepted by the committee and sent to the foundry to be cast in bronze. Mr. Brown has been paid $10,000 on account. The balance of the fund ($11,000) has been invested in 5-20's.

#### Miscellaneous.

The American Flint Glass Works was damaged by fire yesterday. Loss, $25,000.

It is announced that the new increased freight tariff west goes into effect to-day, and the ruinous competition between the roads leading west has been terminated by compromise.

WASHINGTON, Aug. 23.—The heat to day is intense. The day is cloudy, but no rain.

GETTYSBURG, Aug. 23.—Only a few officers have arrived. General Meade and staff and other Generals who participated in the battle, will arrive to-morrow. The attendance of Confederate Generals will be small. General Lee states that business prevents his attendance.

ROCHESTER, N. Y., Aug. 23.—The old Rochester House block on Exchange street, occupied by a planing mill and sash factory was totally destroyed by fire this afternoon, together with nearly a million feet of lumber in an adjoining yard. The aggregate loss on the building and stock is about 100,000.

SARATOGA, Aug. 23.—The trot between Mountain Boy and Lady Thorne will take place on Monday at 12 o'clock. The former is said to have made a quarter of a mile in 34 seconds while training.

LOUISVILLE, Aug. 23.—Three companies of the State Militia left this morning for Lebanon to be distributed in the lower counties, where the regulators have been depredating. The heat to-day is intense. Thermometer, 102.

CHICAGO, Aug. 23.—Albion N. Towne, Assistant Superintendent of the Chicago, Burlington and Quincy Railroad, has been appointed General Superintendent of the Central Pacific at a salary of $13,000 in gold. Governor Palmer has appointed delegates to the National Capital Convention at St. Louis.

#### Cuban Affairs.

WASHINGTON, Aug. 23.—Cuban advices to the 19th have been received here. They give the following statement of the political situation there:

Volunteers are exhibiting the purposes of their organization—that of seizing the government of the island of Cuba from Spain. Everywhere throughout the island the volunteers and the Junta are acting in concert with the Arguntmiento at Havana and exercise the same control over De Roda that expelled Dulce from his position.

It is reported that a formidable organization of Spaniards in the interest of Cespedes' government in every part of the island, has been exposed through means of a spy. The object of this organization was to counteract that of the volunteers and strengthen the Cubans in the field in the means necessary to carry on the contest. This they did, but the exposure has driven hundreds into the Cuban army and given them arms and physical power which will be a terror to the Spanish troops and volunteers as organized.

It is reported that De Roda contemplates resigning and returning to Spain, believing that a longer continuance in his present position would detract from his well earned reputation.

### BY ATLANTIC CABLE

PARIS, Aug. 23.—The *Journal Official* publishes an imperial decree appointing General Leboeuf Minister of War to succeed Marshal Neil, deceased. The French officials have arrested five more Carlist chiefs on the Spanish frontier.

MADRID, Aug. 23.—The troops are still pursuing the fugitive Carlists. In the frontier provinces they have taken many prisoners. The wife of Pato, the Carlist leader, was captured at Almagro. She has interceded with Gen. Prim for the life of her husband. Dissentions have arisen in the Cabinet in regard to the manner in which the Government should proceed against those Bishops who have refused to obey the late decree of the regent. In Barcelona, 15,000 working men have struck for higher wages. Other are expected to join them in the movement. Grave fears are entertained for the preservation of order. There is a rumor that Gen. Borrzle, Duke of Chester, will be exiled to the Canaries.

The Regent Serano positively denies that he sustains the pretensions of the Duke Montpessier to the throne of Spain. He declares he is entirely neutral on the question of the disposal of the crown.

It is asserted on good authority that the preliminaries of a treaty for the cession of Cuba have been signed.

The *Herald's* Havana special of the 17th via Key West, states that intelligence from Catalonia on Tuesday reports that 10,000 insurgents had appeared in that vicinity. But few troops were in the district, and the Governor was unable to check the Patriots, who are destroying all property owned by Spaniards.

### OUR SAN FRANCISCO DISPATCH

Austin Lundgreen, native of Switzerland, aged 23, died suddenly this morning in the water closet of Saunders' Hotel, on Sacramento street. He had been unwell for some weeks, and probably died a natural death.

A chemical analysis of the stomach of Henry Pretsar, who died while being conveyed to the county hospital, some weeks ago, show the presence of morphine. It is supposed he committed suicide.

The sloop *Randall*, from Suisun, loaded with produce, collided with the bark *C. B. Echebauia*, last night, carrying away the bark's jibboom and head gear. The *Randall's* main sail was split and her gaff and topmast carried away.

A little girl named Henrietta Bevan, wandered from home on Sutter street last evening, and has not been found.

Joseph McCall and Joseph Williams were arrested this afternoon for passing counterfeit fives and tens on a man from Stockton, name unknown.

The demands for duties during the past week were $194,388 77.

San Francisco, Aug. 23.—The ship *Forest Queen* collided with the bark *Queen of the Colonies* to-night, carrying away her fore top gallant and mizzen mast; both vessels drifted on to the brig *Jennie Carig*, carrying away the ship and brig's jibboom. The *Golock* got the bark clear and left her to go to the ship when she drifted on a bar near Meigs' wharf. A man on the ship was struck by a spar and his leg broken.

A melancholy little incident is related of the ex-Empress Carlotte. This unfortunate Princess has been staying for some time at Spa. The other day she insisted with such vehemence on playing at roulette that it was impossible to restrain her. On approaching the table she deliberately placed a gold piece on the number 19. The Emperor Maximilian was shot on June 19. The wheel turned, and, though 37 chances were against her, she won. She smiled sadly, took up the money, and quietly left the room. On her way out a poor man passed by. She gave him all the money, with the injunction that he was to "pray for him." It is known that the Empress Carlotte never pronounces the name of Maximilian.
